

How to Install a LED Mirror in your Car

Looking for a new way to customize your car? Our LED Car Mirror is the perfect solution! This innovative product offers three different modes, so you can choose the look that best suits your style. Plus, it's universally compatible and easy to install, making it a great choice for anyone.

Steps to Install

This is a really simple installation, but for those of you that aren't very hands on – you might find this valuable.

1. Find a secure spot to mount the [LED car mirror](#), it has been designed to fit on sun visors. However you can move it to different locations or hold it manually.
2. Mount the mirror, using the 2 straps attached, secure firmly so there is no play.
3. Test that the LED mirror is not obstructing the operation of your car.

It's really that easy to mount your [car vanity mirror with LED lights](#).
